

# UCL/UCT RETRO TRIM SYSTEM

## Features

The UCT Under Canopy Trim system is an innovative modular family of RetroTrims that are used to retrofit or expand the installation possibilities of the UCL. These UCT trims are used in conjunction with standard UCL luminaires to provide you the most flexible array of solutions on the market today. In addition to the inventory and installation advantages of a modular system, the UCL fixtures can be easily removed from the UCT panels and re-used for a new installation when you replace your old canopy.

- Modular design for flexibility, availability and value.
- Used with UCL fixtures to create a multitude of product offerings.
- White Lektrocote powder paint for superior longevity.
- Can re-use UCL for new installations.
- Easy, fast and cost-effective installation.
- Improved lighting with less energy.
- Incorporates all the UCL features and accessories.
